

Check of compatibility:

The mounting brackets should be fitted to two major frame bars on the right hand side of the pushchair, between 16 -37.5cm apart, and between 35-43cm from the floor. The front bracket can be fitted up to approx. 8 cm higher than the rear bracket if it helps achieve a good connection. As a result, the Buggypod® seat tilts back slightly and you may prefer that. The mounting brackets and the Buggypod® must not interfere with the braking system or folding mechanism of your pushchair.

Compatible strollers:

- ABC Design Amigo, Giro, Oregon 6, Primo, Tech. Rider, Turbo4
- Arrue X-Kape, Buggy, Minus
- Atlass Buggy
